

Step 5: Test and Refine the Solution (Debug and Verify)

Tests

TESTS	Outputs	STATUS
Compare real time with feeding scheduled time	Further operations if time matches	OK
Food amount is full	Dispense food	OK
No food	Turn on alarm	OK
Food not consumed	Turn on alarm	OK
Bowl is empty	Happy Meal	OK

Improvements

1. Should have selective food options. (Separate for dogs and cats)
2. Instead of physical alarms, notifications can be sent to the owner's personal device.
3. Instead of fixed time, frequently adjustable time should be available.
