

Step 2: Organise and Describe the Data

Data table with inputs/outputs and operational parameters.

Type	Name	Description	Operational Parameters
Input	Feeding times	Food dispensing time	6:00, 12:00, 18:00
Input	Time detector	Real time comparison	24-hour format
Input	Food amount sensor	Availability of food	Food>250g
Input	Bowl weight sensor	Checks food consumption	Food<10g
Input	Timer	Monitor time after food is dispensed	10 minutes
Output	Dispenser	Provides food in the bowl	Rotation 90°
Output	Alarm System	Alert staffs	Condition -Food not dispensed -Food not eaten
