

Step 3: Plan the Solution

Algorithm

1. Identify food schedule
2. Compare with real time
If time matches (6:00 or 12:00 or 18:00)
 - a. Check food amount
If enough food is available (food>250g)
 - Activate dispenser/servo motor
 - Check bowl weight
 - Start 10-min timer
 - After 10-min, check bowl weight
If food is eaten (food<10g)
END
 - Else
Activate Alarm Systems
3. Process Continues
